**DETAILED ACTION**

**Claim Rejections - 35 USC § 102**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-10, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,728,464 (Checketts).

Regarding claims 1, 2, and 4-10, Checketts discloses a metal hydride core coated with a water impervious material. The material is a plastic material such as polyethylene plastic and the metal hydride may be NaH (See claims 1, 5, and 6).

Regarding the limitation of claims 1 and 7 that reads “said barrier being of sufficient length and flexibility to be wrapped around a spool,” has been noted but not considered since the limitation is directed to an intended use. Note, that the spool is not required in the device of claims 1 and 7. Note, “A claim containing a “Recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus” if the prior art apparatus teaches all the structural limitations of the claim. *Ex parte Masham*, 2USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

Regarding claims 16 and 17, Checketts discloses a method for generating hydrogen, comprising providing a fuel source comprising metal hydrides bodies (pellets) and a water impervious material encasing said metal hydrides bodies; removing by cutting in half a first

discrete body (pellet) to expose the metal hydride bodies and reacting the exposed metal hydride with water.

No difference is seen between the instantly claimed invention and Checketts' disclosure.

**Allowable Subject Matter**

3. Claims 3 and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 11-15 have been allowed.

5. The following is a statement of reasons for the indication of allowable subject matter:

Claims 3 and 18-20 disclose allowable subject matter. Regarding claim 3, the prior art (Checketts) fail to disclose or suggest the device further comprising a spool, wherein the carrier is wrapped around the spool. Regarding claim 18 and 20 the prior art fails to disclose or suggest that the barrier is stored on a spool and the step of unrolling the first portion of the barrier from the spool. Regarding claim 19, the prior art fails to disclose or suggest transferring heat from a first reaction chamber to a second reaction chamber; passing Al and water into the second reaction chamber and reacting Al and water in the second reaction chamber.

6. The following is an examiner's statement of reasons for allowance: Claims 11-15 are allowable upon consideration of the prior art. The prior art fails to disclose or suggest a device comprising a reaction chamber; a spool; a fuel source wrapped around said spool, said spool fuel source comprising a chemical hydride core and an elongate moisture barrier encasing said core, said fuel source passing from said spool to said reaction chamber.
